Subject: Re:Toxicology Program: ISO E Super

Dr. Masten:

I am writing to urge inclusion of ISO E Super for toxicological testing. I wish all fragrance chemicals were so tested before the public is forceably exposed.

My local grocery store, recently purchased by Kroger, and currently being remodeled to their specifications has introduced fragrance into the store, probably through the air system. Every product I brought home from that store reeks of perfume and it is surely settling on the produce so people will not only be breathing it, they will be eating it.

ISO E Super is a good place to start.

Thank you for your consideration.
